

ARCHI QUARTERLY BREAKFAST

February 13, 2019

WELCOME & INTRODUCTIONS

Kathryn Lawler, ARCHI

AGENDA

- **Atlanta Transformation Scenario**
- **Year in Review: 2018**
- **Expand Insurance Priority Update**
- **Health Equity Review**
- **500 Cities Data Presentation and Exploration**
- **Data + Community Perspective**
- **Announcements & Closing**

ATLANTA TRANSFORMATION SCENARIO

FAMILY PATHWAYS

EXPAND INSURANCE

INNOVATION FUNDS

GLOBAL BUDGETING

CARE COORDINATION

HEALTHY LIFESTYLES

CAPTURE AND REINVEST

Health Equity

BUILDING BETTER OUTCOMES

Health is not balanced in Atlanta. Many neighborhoods do not have the resources they need to live active, healthy lives. Not all Atlantans have access to healthcare. **Historic inequities** hold back too many individuals and families.

How will ARCHI drive health systems transformation? By committing to a 28 year plan that comprehensively addresses health and health equity, far beyond healthcare.

What does health for all look like? Expanding insurance and economic opportunity, promoting healthy lifestyles and efficient healthcare provision will improve health status and increase the region's economic vitality.

INNOVATION FUNDING

Diverse investments support the development of new models of care and new alignments between clinical and non-clinical services.

CAPTURE & REINVEST

Payers calculate healthcare cost savings from interventions and invest a percentage into community health.

GLOBAL PAYMENTS

Healthcare dollars incentivize care that keeps people healthy, not just treating them when they are sick.

FAMILY PATHWAYS

Improve economic prospects for families and students including education, job training affordable housing and transportation.

CARE COORDINATION

Providers share information across systems to reduce duplication. Supportive services help individuals and families navigate clinical and community services.

EXPAND INSURANCE

Bolster rates of health insurance coverage.

HEALTHY LIFESTYLES

- Reduce smoking and tobacco use
- Improve diet and nutrition
- Increase exercise and physical fitness
- Reduce drug and alcohol use
- Reduce unprotected sex and STI transmission
- Increase preventative care efforts for physical and mental health

IN 2040 WE WILL SEE

+7% in worker productivity

+16% in access to preventative & chronic care

-45% in non-urgent ER visits

-13% in healthcare costs

-13% in hospital readmissions

What we know about the immigrant population in GA?

Jones CP *et al.* *J Health Care Poor Underserved* 2009.

Who is the gardener?

- Power to decide
- Power to act
- Control of resources

□ Dangerous when

- Allied with one group
- Not concerned with equity

“Health [inequity] is not an accident, but a production of society.”

- Natalie Burke

“We are too focused on health as an individual issue. We are ahistorical. We are invested in the myth of meritocracy. This makes us feel powerless and not understand our power. Ask what can WE do rather than what can I do.”

- Camara Jones

“Equity can’t happen when policy is being done to people, not with people.” - Tom Weyandt

“Calling Atlanta ‘the city too busy to hate’ was giving ourselves a pass, allowing ourselves to forget all that has happened here. Ask ‘why are things the way we are’? We all traffic in mythologies.” - Doug Blackmon

“Begin by shifting the narrator to shift the narrative. We change by centering our voices, and early.” - Alison Johnson

“Equity is not fast or efficient.” - Odetta MacLeish-White

“Atlanta as the ‘Black mecca’ is a myth. Atlanta’s Black poor folks have consistently been abandoned by both Whites and by the Black elite.” - Maurice Hobson

“Racism saps the strength of the whole society.” - Camara Jones

**Your city
Your health
Your voice**

The 500 Cities Project: Local data for better health

Health at the neighborhood level: The CDC's 500 Cities project

- To help communities pinpoint where policy interventions may be most effective, the CDC created the 500 Cities dataset.
- This dataset uses modeling techniques to estimate overall health and disease risk for the country's largest 500 Cities.
- The dataset makes it possible to examine the health of a city overall and at the neighborhood scale.

The country's largest 500 cities

500 Cities health measures

Health Outcomes

- Arthritis
- Current asthma
- High blood pressure
- Cancer
- High cholesterol
- Chronic kidney disease
- COPD
- Coronary heart disease
- Diagnosed diabetes
- Mental health not good for 14 or more days
- Physical health not good for 14 or more days
- All teeth lost among adults age 65 or older
- Stroke

Prevention

- Current lack of health insurance
- Visits to doctor for routine checkup
- Visits to dentist or dental clinic
- Taking medicine for high blood pressure control
- Cholesterol screening
- Mammography among women age 50 to 74
- Older adults age 65 and older who are up to date on core preventative services
- Colonoscopy among adults ages 50 to 75
- Well woman checkup among women 21 to 65

Unhealthy behaviors

- Binge drinking
- Current smoking
- No leisure-time physical activity
- Obesity
- Sleeping less than 7 hours

Atlanta – Overall City Health

How Atlanta stacks up

Among the country's largest 500 cities, Atlanta ranks:

- **#266** – Overall health
- **#374** – Health outcomes
- **#123** – Prevention
- **#308** – Unhealthy behaviors

City	Overall Health Rank	Health Outcomes Rank	Prevention Rank	Unhealthy Behaviors Rank
Johns Creek	8	19	8	47
Roswell	41	66	18	114
Sandy Springs	42	85	16	103
Atlanta	266	374	123	308
Athens	375	433	238	332
Warner Robins	381	429	185	413
Columbus	396	436	174	431
Augusta	428	468	205	451
Savannah	433	457	239	450
Albany	485	490	305	483
Macon	492	497	386	491

4 High Risk Health Issues

When compared to the country's largest 500 Cities, Atlanta's residents have elevated prevalence rates of:

➤ Diabetes

TABLE DIALOGUE

- 1: Create two groups at your table
- 2: Designate someone to manage a laptop or tablet
- 3: Select areas of interest and explore the data
- 4: Reflect and answer the questions on the handout
 - What did you see or learn in the data you explored?
 - In what ways can you use these data to support current or future opportunities? Please be as specific as possible.
 - How do these data illuminate parts of the system that are perpetuating health inequities?
