METRO ATLANTA SPEAKS

Mike Carnathan, Director of Research & Analytics Atlanta Regional Commission

What is the Biggest Problem Facing The Region?

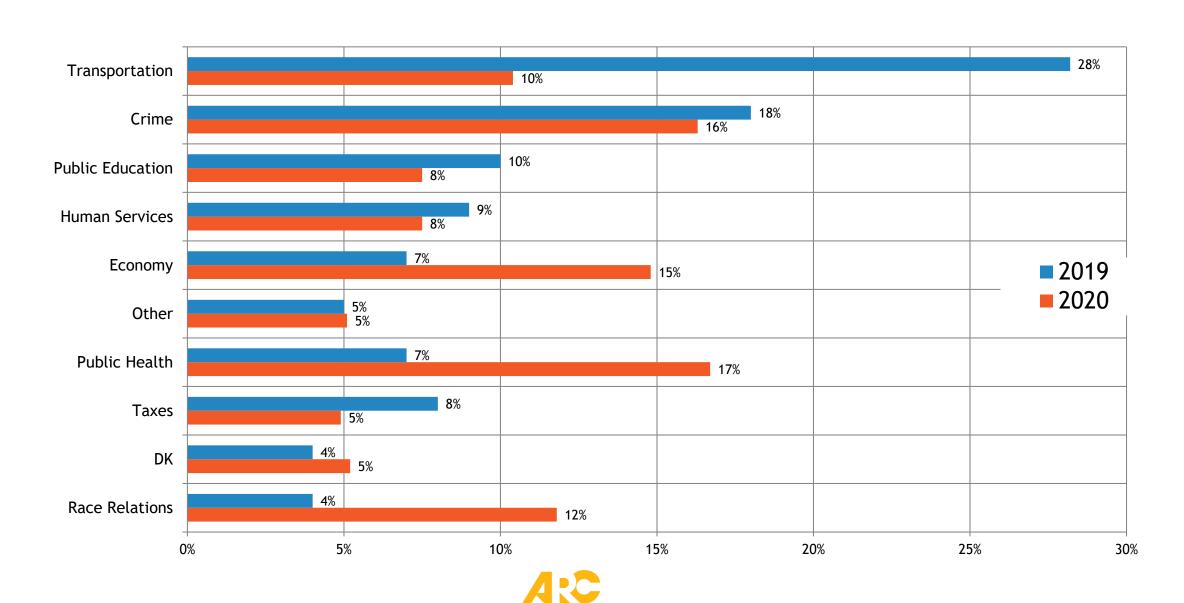

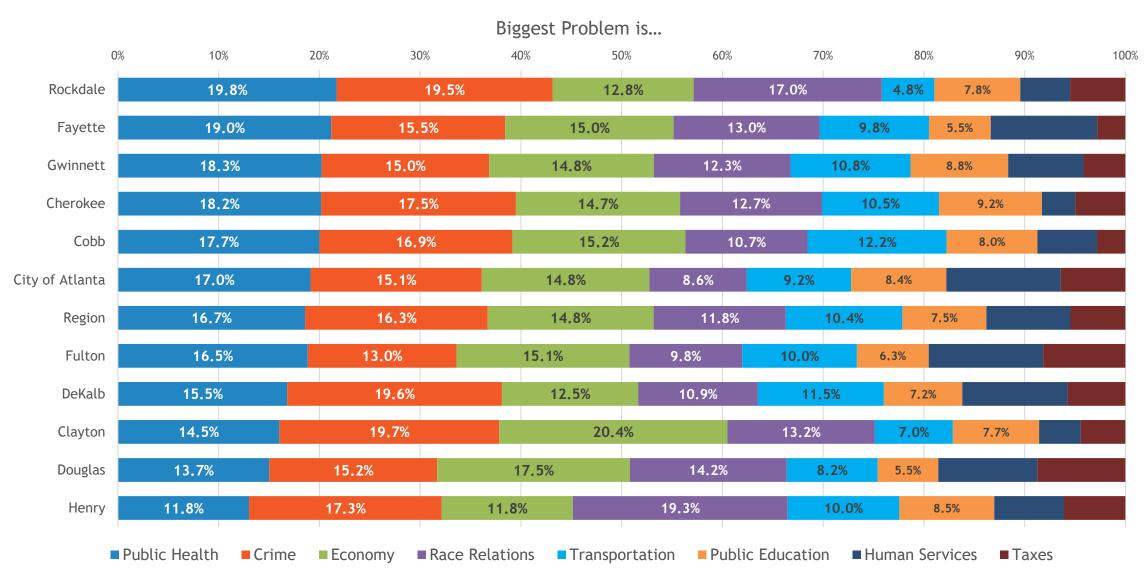

Yes, 2020 is Different

Atlanta Regional Commission

Big Differences Among Our Jurisdictions

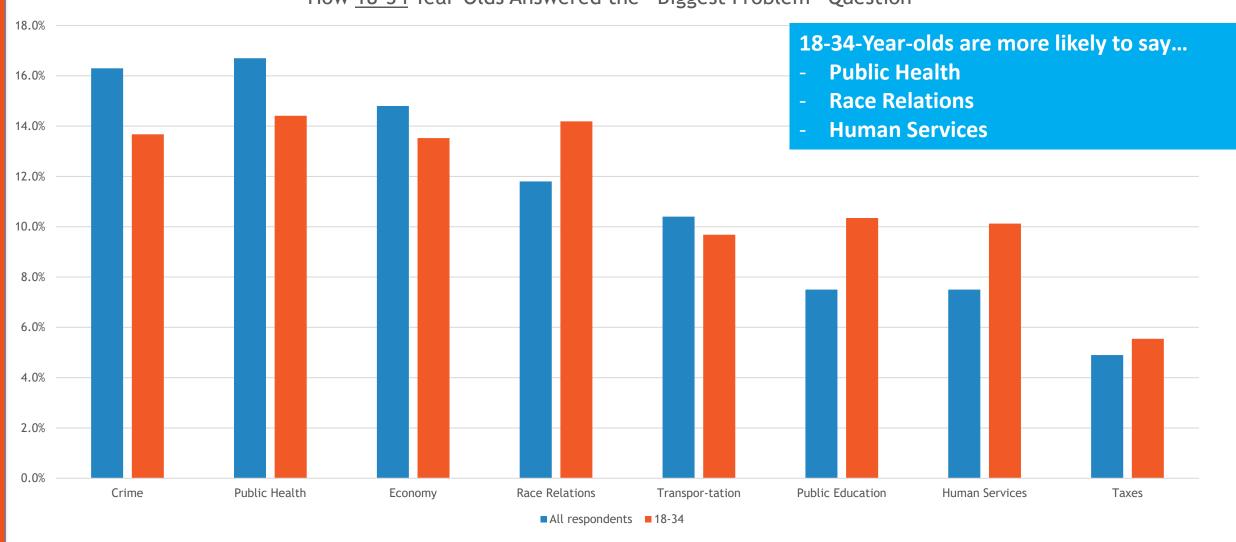

Big Differences Among Age Groups Too... (18-34)

How 18-34 Year-Olds Answered the "Biggest Problem" Question

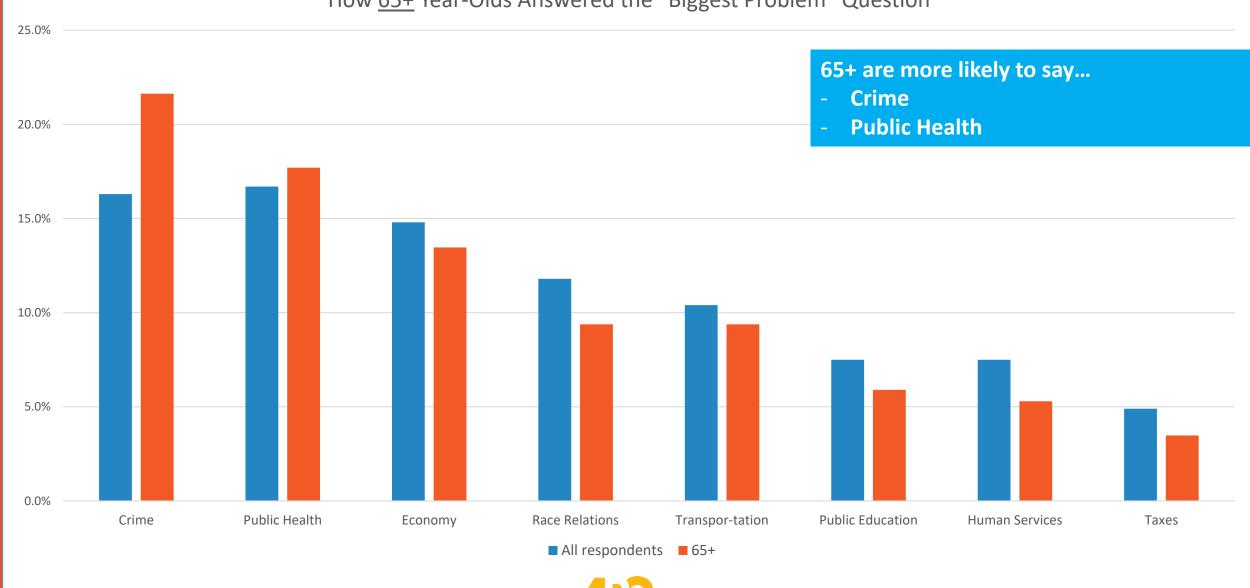

Big Differences Among Age Groups Too... (65+)

How <u>65+</u> Year-Olds Answered the "Biggest Problem" Question

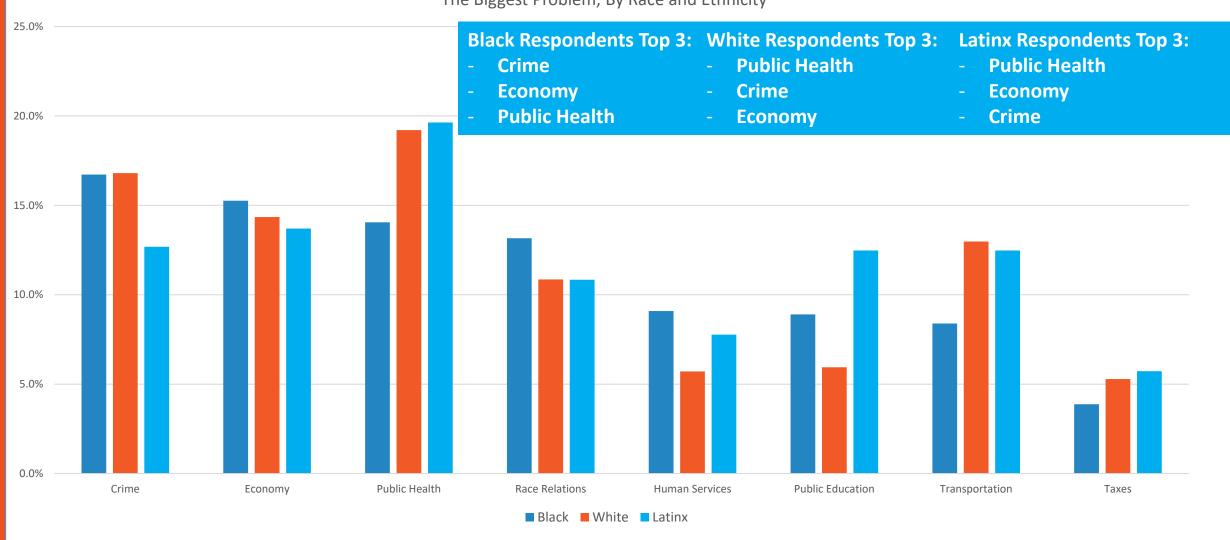

And, Of Course, Big Differences Among Races

Atlanta Regional Commission

Key Takeaways From the "Biggest Problem" Question

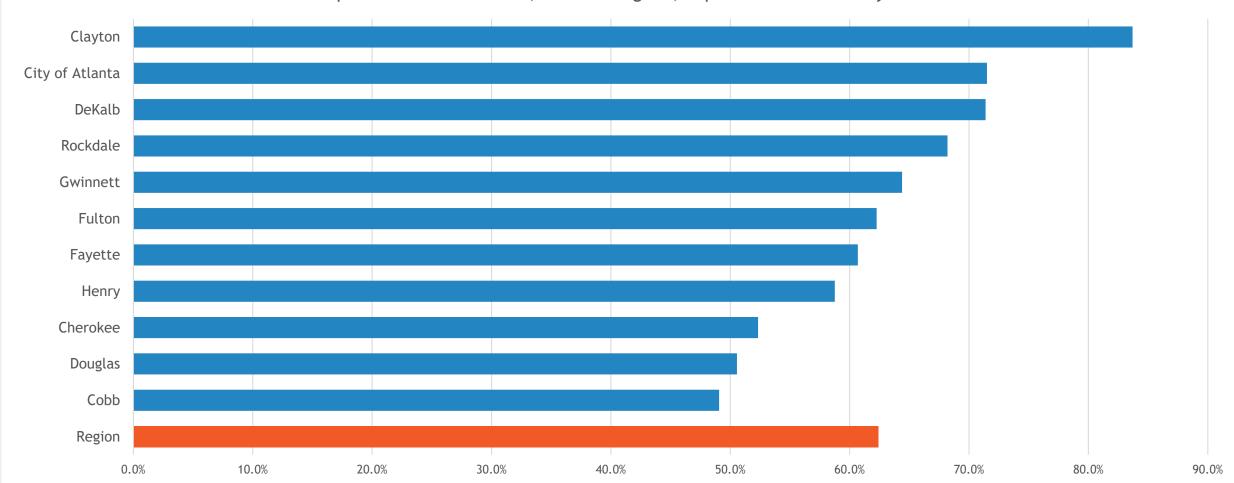

- For the first time since 2013, **something other than "Transportation"** was indicated as the biggest problem facing the region ("Public Health")
- After years of plunging in importance based on the biggest problem question, "Economy"
 returned to the Top Three as the pandemic continues to take a toll on respondents' pocketbooks.
- "Crime" was the top issue in four jurisdictions, and was, by far, the biggest issue for older age cohorts.
- Big differences in how survey participants responded based on age and race, with persons of color and younger age cohorts more likely to indicate that "Race Relations" was a big problem.
- Big differences in how survey participants responded based on location, too. For example, residents of Douglas, Henry and Rockdale are more likely to indicate "Race Relations" as the biggest problem.

Majority of the Region's Residents Experienced Significant Employment Impacts

% Respondents Who Lost Job, Was Furloughed, Experienced Cuts in Pay or Hours

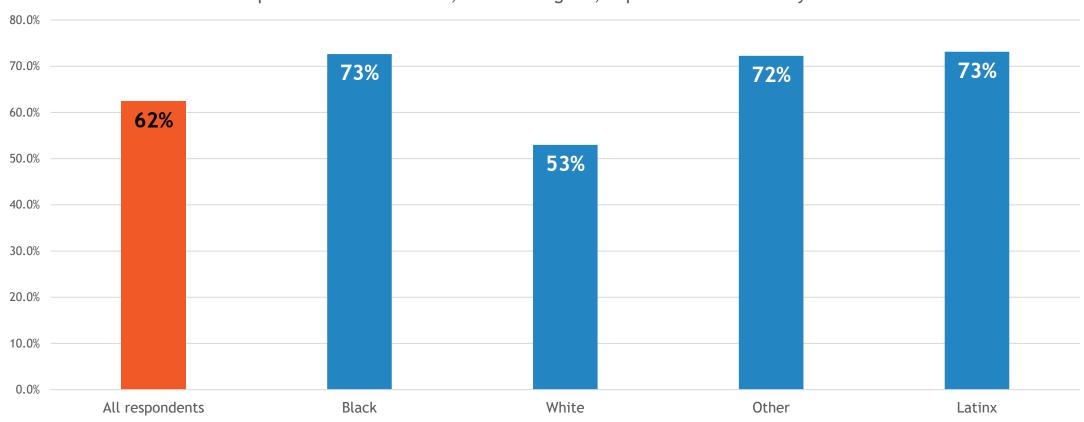

These Impacts Aren't Equitably Distributed Across Race/Ethnicity, However...

% Respondents Who Lost Job, Was Furloughed, Experienced Cuts in Pay or Hours

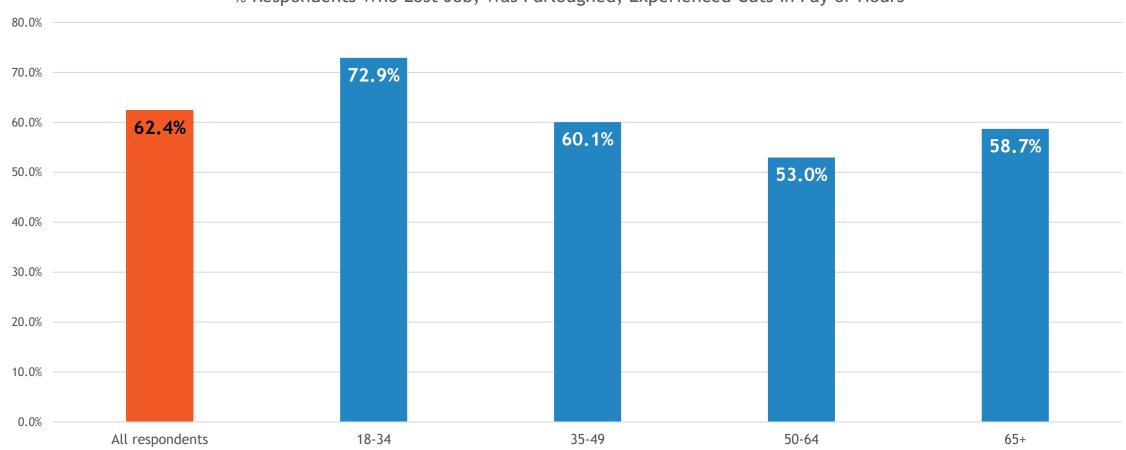

...Nor By Age

% Respondents Who Lost Job, Was Furloughed, Experienced Cuts in Pay or Hours

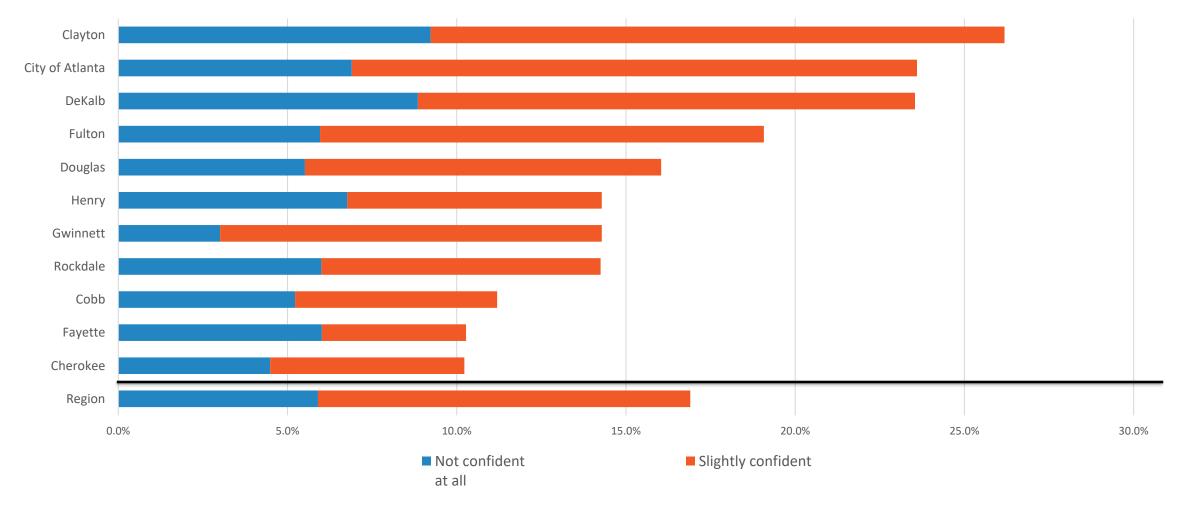

Economic Pain Spreading To Housing...

% Responding "Not Confident At All" or "Slightly Confident" in Ability to Make Next Mortgage/Rent Payment

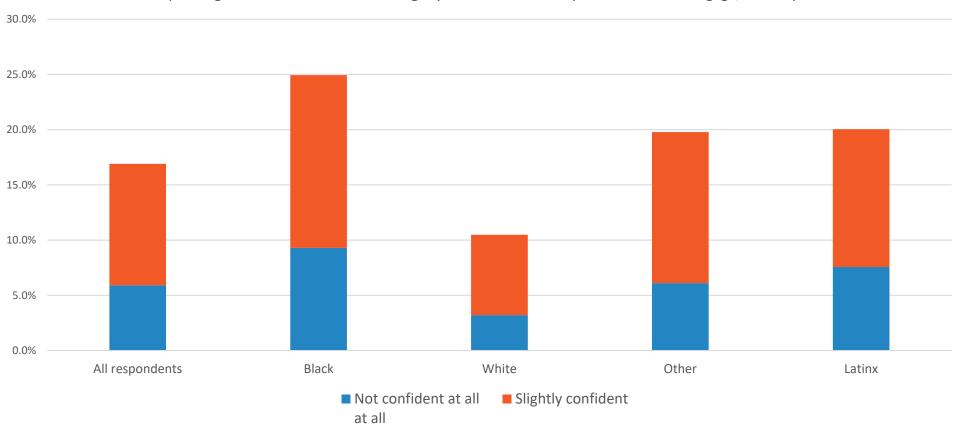

...And, Again, Big Differences Among Race/Ethnicity...

% Responding "Not Confident At All" or "Slightly Confident" in Ability to Make Next Mortgage/Rent Payment

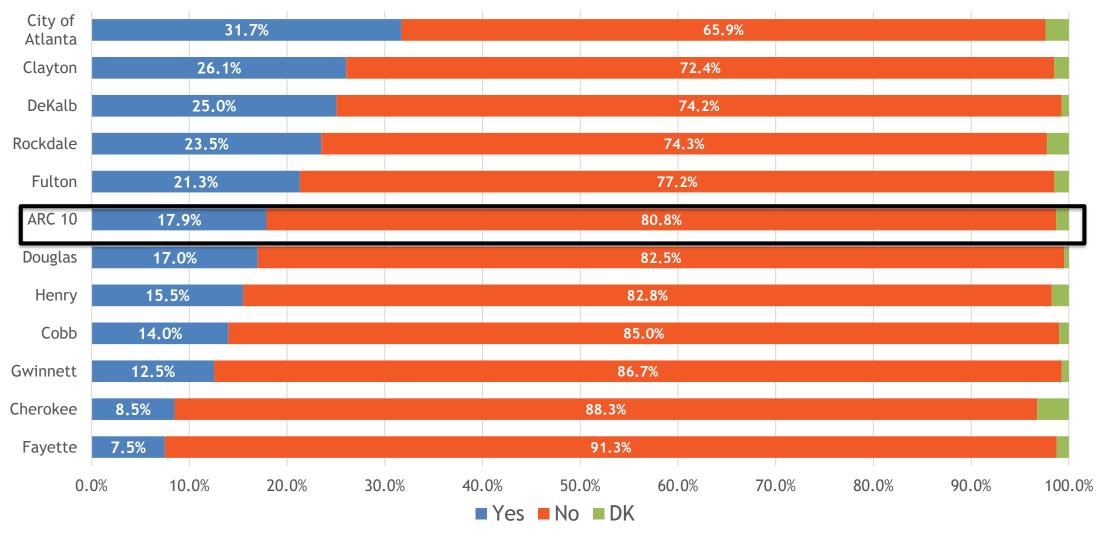

Significant Responses of Food Insecurity

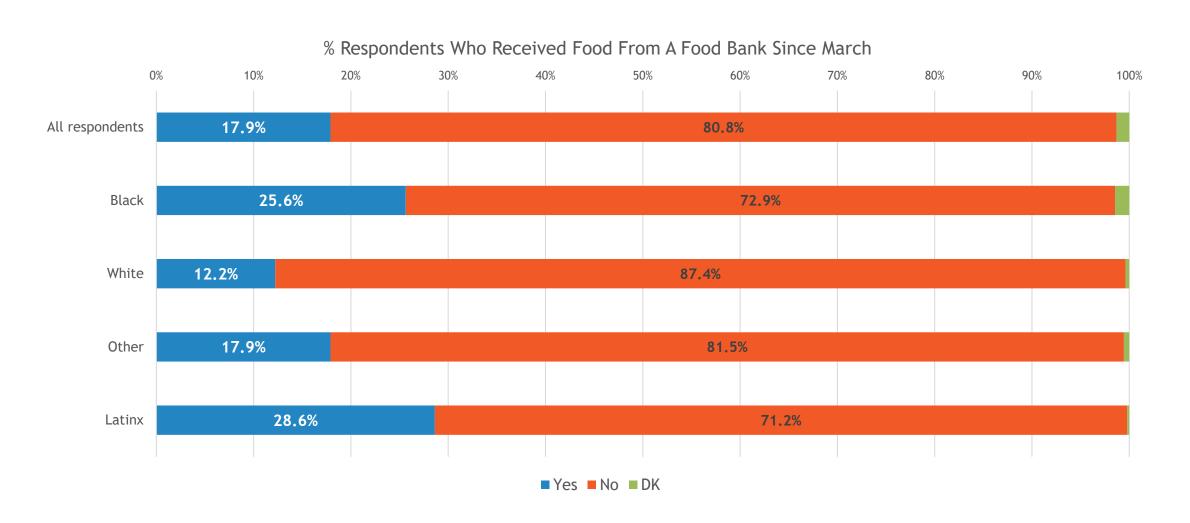

% Respondents Who Received Food From A Food Bank Since March

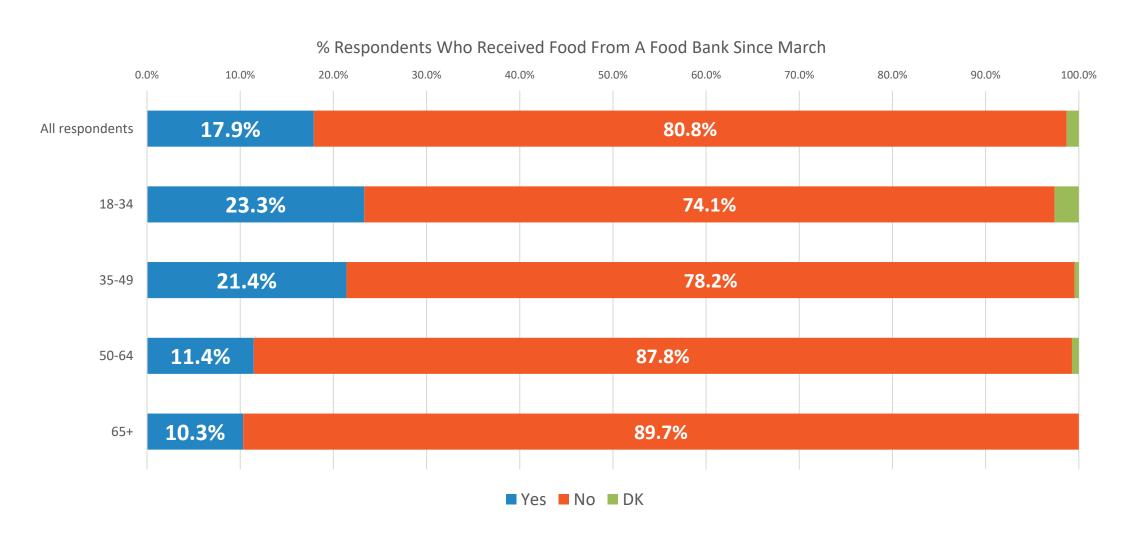

Again, Persons of Color More Likely To Indicate Struggles with Food Insecurity

And, Again, Younger Cohorts Struggle More With Food Insecurity

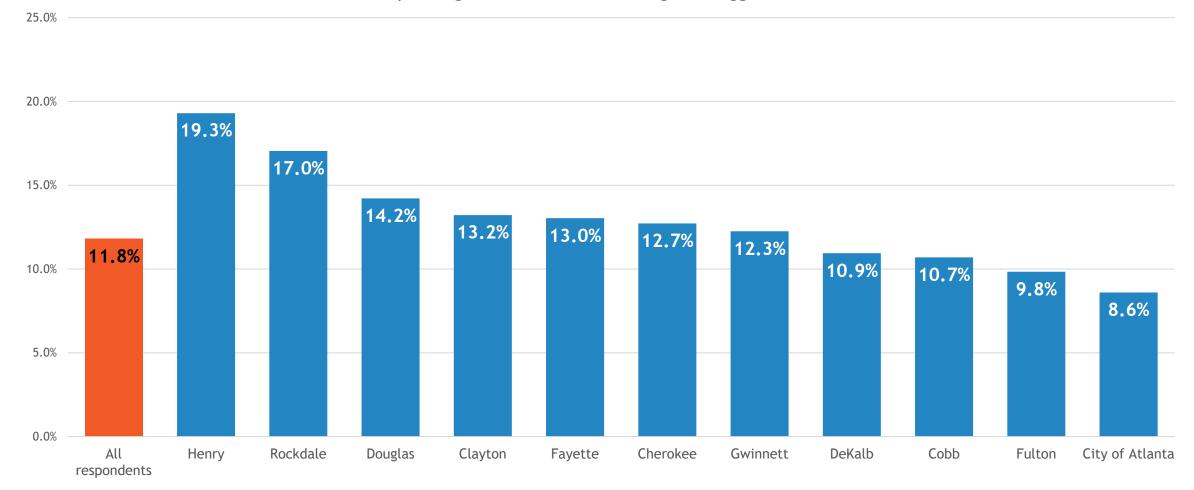

Perceptions Race Relations And Overall Awareness

% Responding "Race Relations" As Region's Biggest Problems

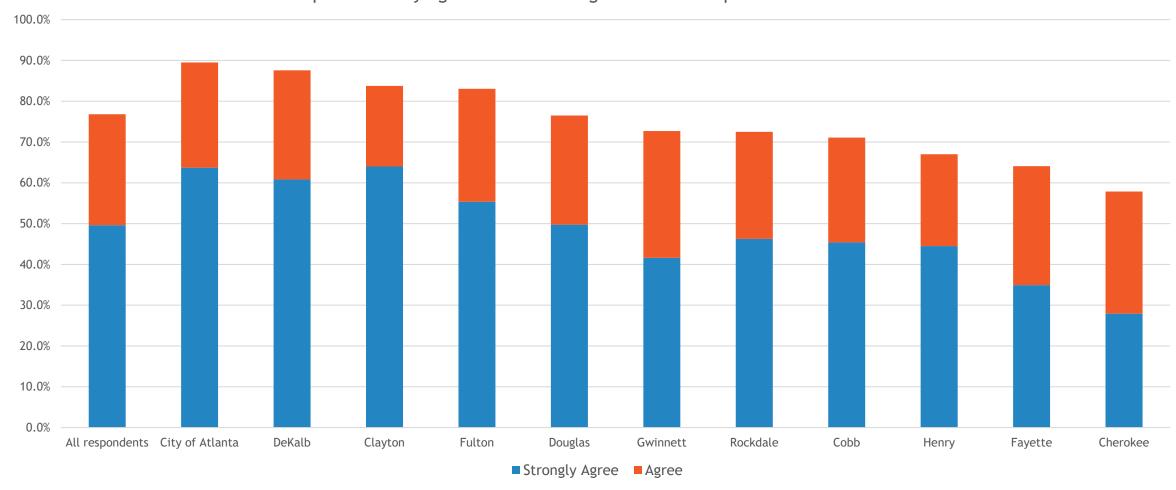

Majority of Respondents Agree That Discrimination Against Black People Is A Serious Problem

% Respondents Saying Discrimination Against Black People Is A Serious Problem

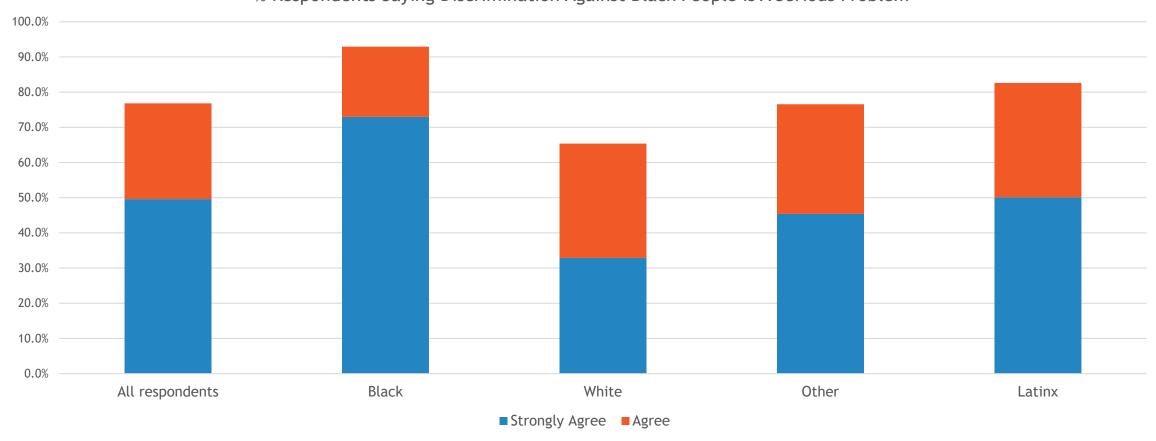

Persons of Color More Likely To See Discrimination as a Problem

% Respondents Saying Discrimination Against Black People Is A Serious Problem

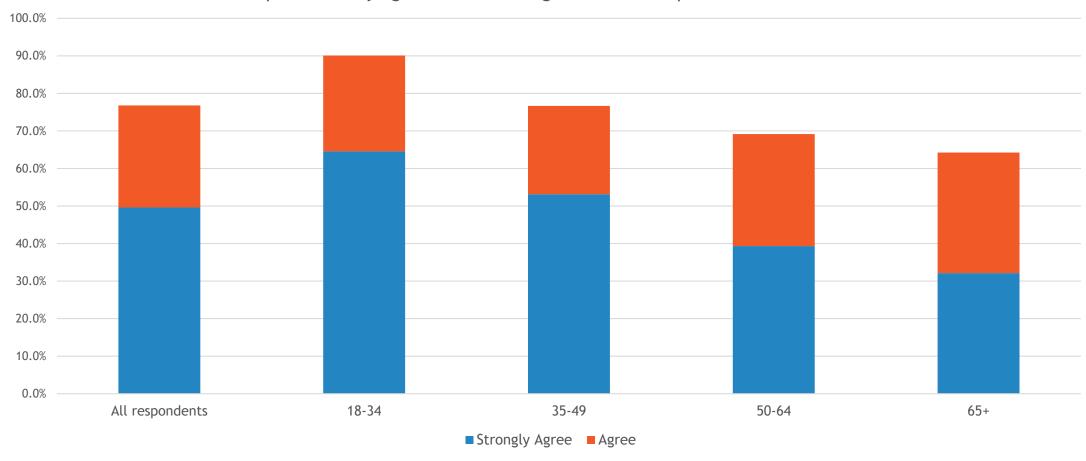

Younger Cohorts Significantly More Likely To Say Discrimination is a Serious Problem

% Respondents Saying Discrimination Against Black People Is A Serious Problem

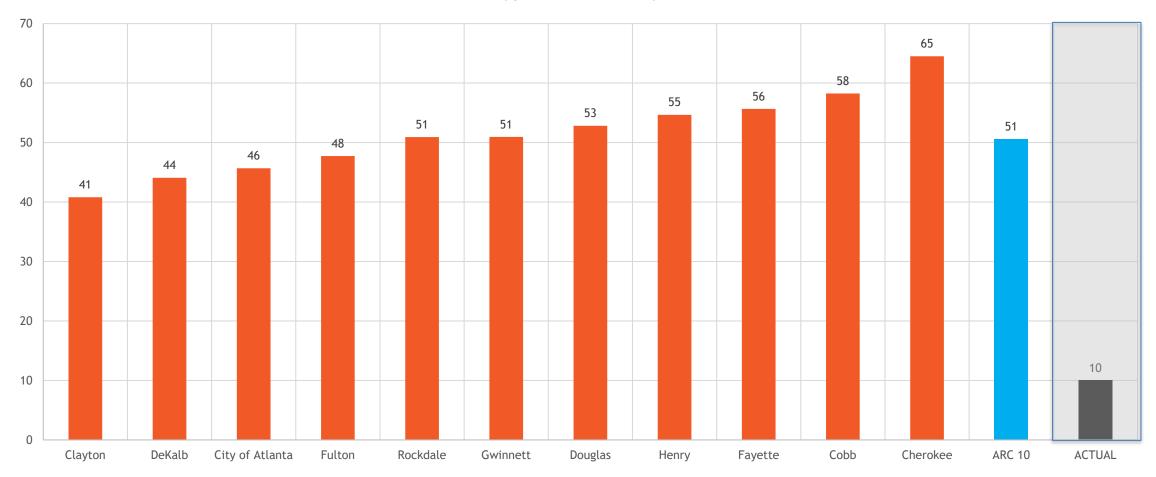

A Lot of Education Needed About Racial Wealth Gap...

If a typical white family in the United States has 100 units of overall wealth, how many units of overall wealth does the typical Black family have?

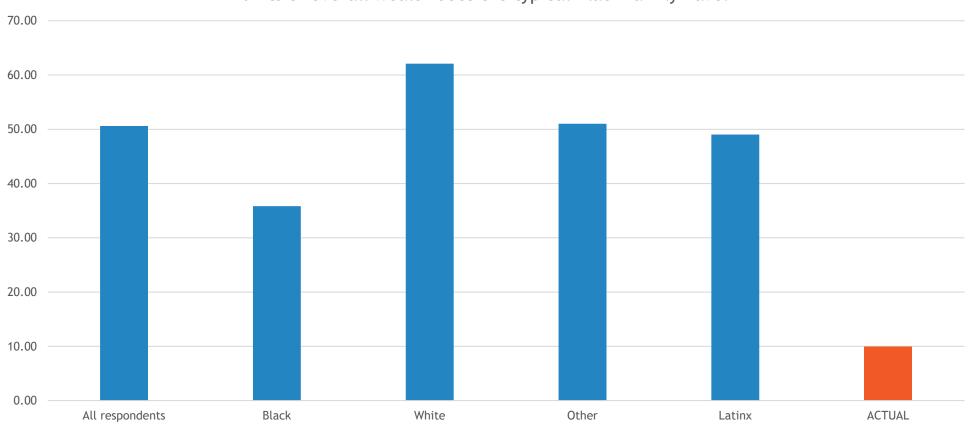

... Across ALL Race/Ethnic Groups, But Persons of Color Come the Closest To Understanding the Racial Wealth Gap

METRO ATLANTA

If a typical white family in the United States has 100 units of overall wealth, how many units of overall wealth does the typical Black family have?

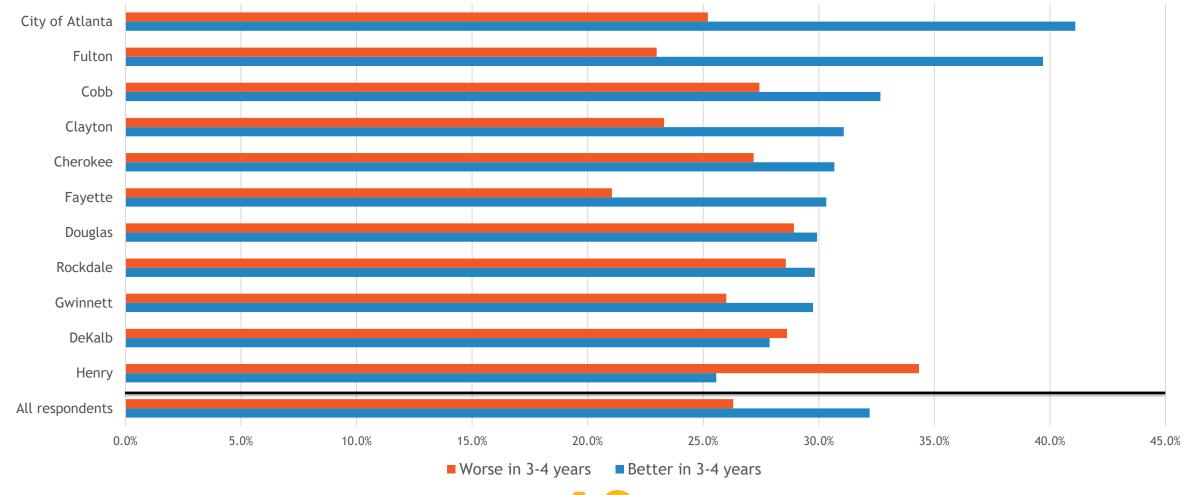

The Future? We're Still Pretty Optimistic

Looking Ahead 3-4 Years, Will Things in Metro Atlanta Be Better, Worse or the Same (% Responding Better or Worse)

Persons of Color More Optimistic

Looking Ahead 3-4 Years, Will Things in Metro Atlanta Be Better, Worse or the Same (% Responding Better or Worse)

Other Regional Issues

You can browse topics using the top buttons as well as tabs in the white top bar. If you click on the any of the topic, then questions will appear on yellow tabs across the top of your page.

Methodology

The Atlanta Regional Commission (ARC), in collaboration with community partners, has conducted the Metro Atlanta Speaks Survey (MAS) annually (since 2013) to take the pulse of metro Atlanta residents and inform the region's planning and decision-making. The survey, now in its eighth year, is the largest of its kind in the Atlanta region. MAS offers a statistically valid snapshot of residents across the Atlanta area on various topics including transportation, the economy, housing and affordability, amenities and quality of life, civic engagement, and other emerging regional issues. This year, an obvious topical focus was the COVID-19 pandemic.

How to Use the Dashboard

This Metro Atlanta Speaks Survey (MAS) Dashboard offers an interactive view of the results for questions asked since 2016. It is organized by topic area, then by questions within each topic area. Above you can see the available topic area tabs in white, stretching out to the right of the screen. This year (2020), with the onset of the pandemic, MAS focused on resident perceptions of and reactions to COVID-19. The first three tabs that you see, from left to right, present the results for questions asked in the 2020 survey. Subsequent tabs document the results, for questions in prior years as available, by topic area.

If you click on any of the topic area tabs, the questions related to that selected topic area will appear on yellow tabs across the top of your page. Then, click on any yellow tab to view results for that given question. You can then change the year and subset to look at different groups of respondents, highlight specific answers or answer groupings by clicking on elements of the legend, and hover over the charts to see specific result values appear (in pop-up windows).

One critical note for use of the dashboard: every question (either topical or demographic) does not have data in each survey year. The reason? many questions (topical and demographic) were not asked in every survey year. Results are only selectable, for any given question, for the years in which that question was asked. As an example, we did not ask any questions about COVID-19 prior to this year (2020) ... and as such, you cannot request, for those questions, data for any year except 2020.

For more detail on methodology and results, check out the content on the Metro Atlanta Speaks Survey webpage: https://atlantaregional.org/plans-reports/metro-atlanta-speaks-survey-report/. Also, there is a separate methodology tab available on this dashboard

A final note: data values displayed in the dashboard for any given question and geography may not exactly match (due to rounding) the data values shown for that same given question and geography in other printed reports or charts of results.

Metro Atlanta Speaks Survey

An Eye on the Key Trends in Metro Atlanta

Each year, ARC and its community partners conduct the Metro Atlanta Speaks public opinion survey to take the pulse of metro Atlanta residents and help guide the region's planning and decision-making.

The survey, which began in 2013, is the largest of its kind in the Atlanta region. It offers a snapshot of residents' views on a range of critical issues such as transportation, the economy, education, aging, and neighborhood quality of life. Metro Atlanta Speaks currently covers a 13-county region and is statistically significant to the county level, as well as for the City of Atlanta.

The 2019 survey offered some fresh insights.
