

HOW WE OPERATE

Looking for not only a new way to work but a new way to hold each other accountable for impact, the team looked for other, like-minded individuals and organizations who would join forces and build a strategy for change. In 2012, ARCHI adopted its 28-year strategy for health improvement in metro Atlanta. In 2013, the first 30 organizations signed on as official members committed to aligning their efforts to the ARCHI strategy and since then partners have combined their work, altered the way they worked, begun to track progress with shared measures and jointly invest. ARCHI works with partners to align their work and their investments toward the implementation of the 7 strategies in the Atlanta Transformation Scenario.
